

Power supply unit

AS-326

Description

Compact switching power supply units which permits the installation of up to 12 modules on the support frame.

Applications

Necessary to supply the amplification modules of the equipment. The number of modules which it can feed varies according to the consumption of the modules and of the consumption of the LNBs in the case of SAT amplifier modules.

Characteristics

Protected against overloads and short-circuits. Made from an aluminium profile and galvanised plate. It includes a protection fuse which the installer can access.
