

Alcad Apartment amplifiers

Model : AI-100

Main features:

- Amplify the VHF/UHF band (40 to 318MHz and 470 to 862 MHz).
- Use to compensate for losses incurred due to long cable runs
- Or compensate for the losses of splitters used in feeding multiple TV points in the apartment.
- Two outputs, main output or secondary (-14 dB) output. Both outputs can be used if required.
- Separate adjustment for VHF and UHF bands.
- Compact amplifier housing.

• Output 1:	VHF (40 ~ 318 MHz)	UHF (470 ~ 862 MHz)
Total Gain	14 dB	24 dB
Adjustable gain	16 dB	12 dB
• Output 2:	VHF (40 ~ 318 MHz)	UHF (470 ~ 862 MHz)
Total Gain	3 dB	11 dB
Adjustable gain	16 dB	12 dB
