

Alcad Apartment amplifiers

Model : AI-210

Main features:

- Amplify both VHF/UHF (40 ~ 862MHz) and Satellite (950 ~ 2150 MHz) input signal
- Use to compensate for losses incurred due to long cable runs
- Or compensate for the losses of splitters used in feeding multiple TV points in the apartment.
- Two outputs, main and secondary output of equal value. Both outputs can be used if required.
- Separate gain adjustment for TV and Satellite bands.
- Compact amplifier housing.

• Output 1:	VHF/UHF (40 ~ 862 MHz)	Sat (950 ~ 2150 MHz)
Total Gain	16 dB	30 dB
Adjustable gain	15 dB	12 dB
• Output 2:	VHF/UHF (40 ~ 862 MHz)	Sat (950 ~ 2150 MHz)
Total Gain	16 dB	30 dB
Adjustable gain	15 dB	12 dB
